SUMMARY

My name is Vinicius Eduardo Dias Da Silva, I'm 19 years old and currently pursuing dual degrees in Software Engineering (Uninter) and Systems Analysis and Development (UFPR). I completed high school with a technical focus on system development. I'm now looking for more opportunities to acquire practical experience and deepen my knowledge on different programming languages as well as frameworks, and on that journey, grow with a professional team.

I have a proactive, leadership-oriented personality and enjoy simplifying complex projects. I have experience with PHP, Laravel, Java, SpringBoot, C, JavaScript, TypeScript, ReactJs, Angular, Python, Node.js, and data storage and manipulation with SQL and NoSQL. I also have growing interest and foundational knowledge in Artificial Intelligence and Machine Learning. I am open-minded and eager to expand my technical skills beyond any single language or technology.

WORK EXPERIENCE

Intern at System Development

May 2026 - Currently

Banco do Brasil

- Maintained, refactored, and debugged legacy PHP and Java codebases to enhance stability and performance.
- Created reports with BI tools.
- Collaborated in SCRUM and Kanban, participating on meetings and code reviews.
- Implemented Unit Tests and CI to increase code quality.
- Implemented Homologation and Development ambients for security on build features and fixing bugs.
- Automated form auto-filling via XLSX file uploads, significantly streamlining data entry for complex forms.
- Implemented and refined OAuth2 authentication flows across enterprise ERP systems to strengthen access control.
- Integrated an internal AI database with the primary database, enabling unified contract data searches within a single interface.
- Developed a time-tracking application to measure employee task completion times and generate automated managerial reports.
- Optimized database query performance and implemented full-text-search indexes to accelerate data retrieval.

Intern at System Development

Aug 2025 - May 2026

Meu Nominho

- Implemented a feature of dynamic reports about Carriers.
- Implemented Mail Sender and Codebar functionalities.
- Improved Jobs and Querys performance.
- Corrected and performed maintenance on legacy code in PHP.
- Improved communication between APIs as well as data processing and error handlers.
- Learned how to use meta-data in EAV (Entity-Attribute-Value) tables.
- Implemented carrier API.
- Collaborated in Agile Projects, participating in daily meetings and code reviews.

EDUCATION

Wizard by Pearson

Feb 2019 - Feb 2022

English

- Fluency: Fluent

High School

Feb 2022 - Dec 2024

Colégio Estadual Emílio de Menezes

- Technology Course in Systems Development

System Analysis and Development

Mar 2025 - Current

UFPR

- Currently in my 4th Semester

Bachelor in Software Engineering

Mar 2025 - Current

Uninter

- Currently in my 4th Semester

SKILLS

- **Programming Languages:** PHP, Java, JavaScript, TypeScript, Python, Go, C, Cypher.
- **Frameworks:** Laravel, SpringBoot Angular, NodeJS, React, Tailwind.
- **Languages:** English.
- **Other Skills:** NGINX, Docker, Neo4j, Postman.
